

Cabinet Maker Job Description

Title

Cabinetmaker

Reports To

Shop Foreman

Summary

The Cabinetmaker is responsible for crafting, assembling and repairing wooden cabinets, doors and other fine wooden furniture to detailed specifications. He or she will produce quality cabinets to specification by designing and or reading blueprints and replicating past designs using hand tools, CNC Machinery and other woodworking machines in a manufacturing environment. The Cabinetmaker will be responsible for knowing and practicing safe working methods, and have a strong knowledge of shop practices, procedures, techniques, tools, equipment, quality control and safety equipment. Dedication to quality craftsmanship and the possession of mathematical and analytical skills necessary to do material estimates are essential in this role. He or she will also be responsible for maintaining a clean and tidy work area and assisting in conducting regular maintenance of tools and machinery. Other duties may be assigned as necessary.
